Computational thinking fosters problem-solving, logic, and creativity. Further, technological advancements are transforming every industry on the planet. With this, today's students should learn how to use and create technology. If they start early, they will have a solid foundation for success in any 21st-century career path.

This year's Hour of Code theme is **#CSEverywhere** where students and teachers are encouraged to investigate the relationship between computer science and various subjects in school, industries, and even career paths. For the detailed program of activities, kindly refer to **Annex A**.

For questions and concerns on the abovementioned subject, kindly contact Mr. Mark Anthony F. Jamisal, Educational Technology Specialist of the ICTS-EdTech, through email at markanthony.jamisal@deped.gov.ph
