CERTIFICATION

As per NVOC Advisory No. 134 series of 2022, this advisory is anchored on the Inter-Agency Task Force for the Management of Emerging Infectious Diseases (IATF) Resolution No. 148-B series of 2021. As stipulated in the mentioned IATF resolution,

"...In areas where there are sufficient supplies of COVID-19 vaccines as determined by the National Vaccines Operation Center (NVOC), all establishments and employers in the public and private sector shall require their eligible employees who are tasked to do on-site work to be vaccinated against COVID-19. Eligible employees who remain to be unvaccinated may not be terminated solely by reason thereof. However, they shall be required to undergo RT-PCR tests regularly at their own expense for purposes of on-site work. Provided that, antigen tests may be resorted to when RT-PCR capacity is insufficient or not immediately available."

Pursuant to this NVOC advisory, it provides the directive to all RVOCs and LVOCs that sufficient supply at the Local Government Unit level is defined as having more than five (5) days to last inventory of COVID-19 vaccines as captured in VORS.

Based on the Department of Health Vaccination Operations Reporting System, Aklan has more than five (5) days to last inventory of COVID-19 vaccines and **is regarded as an area with a sufficient supply of COVID-19 vaccines.**

Issued this 28th day of March 2022 at Kalibo, Aklan.

LESLIE ANN L. SEDILLO, MD, MPP
Provincial Health Officer II, PHO
Acting Chief of Hospital, DRSTMH
